Gifford School | Grades 4K-8

Largest 4K-8 campus with the Planetarium and unique art programs.

With a mission to prepare students for the future, the Gifford staff works daily to prepare children to reach their potential and beyond in their newly renovated K-8 building.

- The Planetarium inside Gifford is used to provide the most current trends in astronomy and space exploration to the District's students.
- Artist in Residence is a PTA-funded program exclusively for 3rd graders. An artist works with students on an art project that becomes part of the collection at Gifford.
- The Gifford reading program includes two active and supportive Reading Dog Therapy Teams. Research supports that reading aloud to dogs can help reluctant students become confident and motivated readers.
- Gifford Big Buddies Program pairs older students with younger learners, who benefit from shared activities, mentoring and encouragement.
- Gifford School offers intramurals including: boys and girls basketball, volleyball, track and cross country as well as band and choir.
